| DES | G I I |      | ,,, |
|     |       |      |     |

MAXMET 200 is a solvent free, epoxy resurfacing and rebuilding fluid, suitable for repairing metal components suffering material loss due to mechanical damage, erosion, corrosion or chemical attack.

MAXMET 200, provides a smooth pour-able fluid ideally suited for filling pitting and scarring on steel and other metallic surfaces. Once mixed the material can be applied up to a thickness of 3.0mm without slumping, also be used with aluminium oxide aggregates to create anti-slip surfaces.

# **Material Properties**

| Appearance        | Base<br>Activator<br>Mixed  | Dark grey paste<br>Amber fluid<br>Mid grey fluid |
|-------------------|---|--|
| Mixing Ratio      | By Weight<br>By Volume  | 8:1<br>3:1                                       |
| Density           | Base<br>Activator<br>Mixed  | 2.70<br>1.00<br>2.50                             |
| Volume Capacity   |   | 440cc/kg   |
| Solids Content    |   | 100%   |
| Slump Resistance  | Nil at  | 3mm  |
| Usable Life       | 10°C<br>20°C<br>30°C  | 50-60 minutes<br>25-30 minutes<br>15-20 minutes  |
| Coverage          | 1kg at a thickness of 1.0mm   | 0.4m2  |
| Cure Times @ 20°C | Movement without load or immersion: Machining and light loading: Full loading: Immersion: | 1.5 hours<br>2.0 hours<br>2 days<br>3 days       |
| Storage Life      | Unopened and stored in dry conditions (15-30°C)   | 5 years  |

## **TECHNICAL DATA**

MET200 TDS-REV1- 2018

| Adhesion                | Tensile Shear to ASTM D1002 on abrasive blasted mild steel with 75-micron profile   | 185kg/cm² 2630psi                    |
|-------------------------|---|--------------------------------------|
| Compressive<br>Strength | Tested to ASTM D 695  | 1075kg/ cm <sup>2</sup><br>15,300psi |
| Corrosion<br>Resistance | Tested to ASTM B117   | Minimum 5000 hours                   |
| Flexural Strength       | Tested to ASTM D790   | 703kg/cm² 10,000psi                  |
| Hardness                | Rockwell R to ASTM D785   | 100                                  |
| Heat Distortion         | Tested to ASTM D648 at 264psi fibre stress.   | 20°C Cure 58°C<br>100°C Cure 98°C    |
| Heat Resistance         | Suitable for long-term water immersion at temperatures up to Intermittent contact with pressurised steam up to 120°.  Resistant to dry heat in excess of 200°C dependant on load. | 70°C<br>120°C<br>200°C               |
| Chemical Resistance     | The product resists attack by a wide variety of inorganic acids, alkalies, salts and organic media.   |                                      |

#### Legal **Notice**

The data contained within this Technical Data Sheet is furnished for information only and is believed to be reliable at the time of issue. We cannot assume responsibility for results obtained by others over whose methods we have no control.

It is the responsibility of the customer to determine the products suitability for use. Maxkote accepts no liability arising out of the use of this information or the product described herein.

### **Health and** Safety

Please ensure good practice is always observed during the mixing and application of this product.

Protective gloves must be worn during the mixing and application of this product. Before mixing and applying the material please ensure you have read the fully detailed Material Safety Data Sheet.
